

Design Rationale – Art Learning App

Introduction

The Art Learning App was designed to provide an engaging and user-friendly platform for individuals interested in learning and improving their artistic skills. The primary goal was to create a simple, visually appealing, and intuitive experience that enables users to discover courses, connect with tutors, and book learning sessions with ease.

Design Goals

The key goals of the design were:

- Create a clean and creative interface that reflects the artistic nature of the platform.
- Ensure easy navigation between screens.
- Simplify the process of finding tutors and booking sessions.
- Maintain visual consistency throughout the application.
- Provide a positive and engaging user experience.

Target Audience

The application is designed for:

- Students interested in learning art.
- Beginner artists seeking guidance.
- Hobbyists looking to improve their skills.
- Individuals searching for professional art tutors.

User Experience Considerations

Simple Navigation

A bottom navigation structure was used to help users easily access major sections such as Home, Courses, Create, Tutors, and Profile. This reduces the learning curve and improves usability.

Visual Hierarchy

Important content such as featured courses, tutor information, and booking actions are highlighted using larger text, clear spacing, and prominent buttons. This helps users quickly identify key actions.

Consistency

Consistent colors, typography, icons, and spacing were applied throughout all screens to create a cohesive user experience and strengthen the application's visual identity.

Accessibility

Readable font sizes, sufficient spacing, and clear button labels were used to improve accessibility and usability for a wide range of users.

Screen Design Decisions

Home Page

The Home Page serves as the primary entry point and highlights featured courses, recommendations, and quick navigation options. This helps users discover content immediately after opening the app.

Courses Page

The Courses Page was designed to organize learning content in a structured manner, allowing users to easily browse and explore available art courses.

Create Screen

The Create Screen encourages creativity by providing a dedicated space for users to create and showcase their artwork. This feature increases engagement and promotes active participation.

Tutors Page

The Tutors Page allows users to view available instructors and compare different tutors before making a booking decision.

Tutor Profile Page

Detailed tutor information, expertise, and experience are displayed to help users make informed choices when selecting a tutor.

Booking Session Page

The booking interface was designed to minimize complexity and enable users to quickly schedule learning sessions through a straightforward process.

Booking Confirmed Page

A confirmation screen provides clear feedback after a successful booking, reassuring users that their session has been scheduled correctly.

Profile Page

The Profile Page allows users to view and manage their account information, creating a personalized experience.

Color and Typography Choices

A bright and creative color palette was selected to reflect the artistic theme of the application. Clean and modern typography was used to ensure readability while maintaining a professional appearance.

Conclusion

The Art Learning App was designed with a strong focus on usability, creativity, and accessibility. By simplifying course discovery, tutor selection, and session booking, the design delivers an engaging learning experience while supporting users throughout their artistic journey.
